

## Checklist to get Plugged In and on the Right Track with your Celljetics business

- 1) **Read the Training Manual** – Go to the web page below and enter the team password. Get the password from your sponsor, or you can find it inside the Celljetics PRO back office. <https://celljetics.com/training/>
- 2) **Get 3-Ring Notebook** – Get organized by printing the prospect list, contact list, scripts, and the monthly tracker sheet.
- 3) **Write Your Prospect List** – Start on your list immediately and get as many names down on paper as possible in the first 24-48 hours.
- 4) **Choose Your Launch Date** – Make a decision when you will start contacting. Don't get stuck on getting started. You don't need to be an expert on the product or business... you don't even need to receive your product order to get started. Most people start reaching out to people before they even receive or try the product.
- 5) **Schedule a Strategy Call** – set up a call with your sponsor to discuss your prospects and contacting strategy. Share with them WHY you are doing this business and what you want to accomplish. Have them help you set a goal for the rank you would like to shoot for your first month.
- 6) **Attend Conference Call / Webinar** – plan to attend the next company or team conference call or webinar.
- 7) **Set up your monthly SmartShip Order** – use the products faithfully and make sure you are qualified each month with 80 QV. Login to your Celljetics PRO back office and click on SmartShip. You can easily change your ship date and what products you want from your back office. This is a commitment and something leaders are signed up for and teach.

The products are amazing, but you need to be patience and give them time to nourish your cells. Some people feel them working right away, and other people need to take them for 90 days or longer. Be aware of how you feel and watch for subtle changes (e.g. your hair and fingernails growing faster). Look at the labels and you'll know your body is getting essential vitamins, minerals, trace minerals, superfoods, and other proven ingredients.
